INTERESTS

Mountaineering — active alpine practice, a recurring personal and design reference.

3D printing & prototyping — ongoing experimentation with materials and processes.

FPV drones — building, configuring and programming: mechanics, electronics, aerial footage.

I am a product and interior designer. My design research starts from observing how people interact and how spaces and objects are actually lived in and used, so that form follows use rather than preceding it. I see design as a gesture that accompanies experience instead of imposing itself, and I look for a balance between technical rigour and material quality. Materials and light are design tools I use to give warmth and character, while references to nature are translated into a contemporary language. Recently I have been focusing on designing and prototyping parts produced with new fabrication technologies, especially resin and filament 3D printing.

EDUCATION

2026 – 2028 — **Master's Programme**
First-level University Master

2023 – 2026 — **B.Sc. in Interior Design**
Politecnico di Milano

Until 2023 — **Technical High School Diploma — Telecommunications**
ITIS A. Rossi, Vicenza

CERTIFICATIONS

2025 — **3D Printing Qualification**
Politecnico di Milano

PROFESSIONAL EXPERIENCE

2 months — **IT Department Intern** INTERNSHIP
Zincol Italia

Two-month internship in the company's IT office, supporting day-to-day operations of internal systems and IT infrastructure alongside the in-house team.

2025 – 2026 — **Sales Associate**
ALDI Italia · Milan

Multi-role position in large-scale retail: checkout operations, restocking and stock rotation, expiry-date control and store layout according to company display standards. Also customer assistance and warehouse support, in a fast-paced, efficiency-driven environment. Strengthened operational autonomy, precision, organisation and teamwork.

2021 – 2023 — **Waiter → Floor Manager**
La Capannina Restaurant · Barbarano Vicentino

Started as a waiter and was promoted to floor manager: from table service and guest reception to coordinating the floor team, with responsibility for shift planning, room set-up and service quality. Constant mediation between floor and kitchen and handling of unexpected situations at peak times built leadership, organisation and customer-relations skills.
